Updates about Alaska and the Indian Ocean radio stations. "Much work has occurred over the last several weeks. several important plans for broadcasting from our new Indian Ocean radio station (Station MWV). Decisions were made concerning the hours that each language will be broadcasting, which of the three antennas will be used and the direction that the signal needs to be aimed. This is crucial as we plan to begin broadcasting just as soon as we can. There is much more involved than putting up an antenna, turning on the electricity and beginning programming. All of this planning and meeting that is going on now is essential. The staff in Alaska and at the Indian Ocean station has been working to bring us to where we are now." Soon and very soon, the entire world will be covered with the gospel. I will keep you informed.

**Why we Broadcast on World Wide Christian Radio,
Coming Soon ... Radio Madagascar and maybe Pan American too**

Internationally, shortwave is big. Roughly 2.5 billion shortwave receivers exist worldwide and at any one time it is estimated 1 billion are turned on with about 3 listeners each. There are as many people in China studying English as there are in the U. S. who speak English. In fact, English is the Bible Koine Greek, or, the Worldwide language of the Marketplace or Common Man, in this 21st Century. Shortwave radio transmissions are directed up, not out. They bounce off the ionosphere, hit the ground, bounce back up to the ionosphere, back down to earth — each of these "bounces" referred to as a "skip"— and it comes down loud and clear in the heart of China and Russia. Shortwave signals cross political, social, racial, economic, and cultural barriers. This means that shortwave is the perfect medium for carrying the Gospel of Jesus Christ to an international community that desperately needs help. Shortwave is our medium. The world is listening as we skip all over the earth with The Good News. THANK YOU FOR YOUR SUPPORT
